PPL Corporation Reports Third-Quarter 2020 Earnings

- *Announces third-quarter reported earnings of \$0.37 per share and earnings from ongoing operations of \$0.58 per share.*
- *Narrows 2020 earnings from ongoing operations forecast range to \$2.40 to \$2.50 per share from \$2.40 to \$2.60 per share.*

ALLENTOWN, Pa. (Nov. 5, 2020) - PPL Corporation (NYSE: PPL) on Thursday (11/5) announced third-quarter 2020 reported earnings (GAAP) of \$281 million, or \$0.37 per share, compared with third-quarter 2019 reported earnings of \$475 million, or \$0.65 per share.

Reported earnings for the first nine months of 2020 were \$1.18 billion, or \$1.53 per share, compared with \$1.38 billion, or \$1.89 per share, for the first nine months of 2019.

Adjusting for special items, third-quarter 2020 earnings from ongoing operations (non-GAAP) were \$450 million, or \$0.58 per share, compared to \$445 million, or \$0.61 per share, a year ago.

Earnings from ongoing operations for the first nine months of 2020 were \$1.39 billion, or \$1.81 per share, compared to \$1.38 billion, or \$1.88 per share, for the first nine months of 2019.

“Despite the ongoing challenge of COVID-19, we continue to provide superior customer service and reliability across all of our service territories, to strengthen grid resilience, and to deliver when it matters most for our hospitals, first responders and the many people now working and learning from home,” said Vincent Sorgi, PPL president and chief executive officer.

“And while COVID-19 and milder weather through the first half of the year have impacted PPL’s ongoing earnings, we are on track to achieve the low end of our earnings guidance and have narrowed our 2020 guidance range to \$2.40 to \$2.50 per share from the prior range of \$2.40 to \$2.60 per share.”

Looking ahead, the company continues to invest in a sustainable energy future through innovation, network upgrades and support for research and development, including the Low-Carbon Resources Initiative recently announced by the Electric Power Research Institute and Gas Technology Institute. The company also continues to invest in smart grid technology to make its electricity service even more reliable, adding that its PPL Electric Utilities subsidiary in Pennsylvania recently marked 1 million customer outages avoided since 2015 as a result of the robust deployment of automated smart grid technology.

Regarding PPL’s U.K. business, the company said its formal process to sell the Western Power Distribution business remains on track. While there can be no assurance of any specific outcome, including whether it will result in the completion of any transaction, the company continues to expect to announce a transaction in the first half of 2021.

Earnings from ongoing operations is a non-GAAP measure that could differ from reported earnings due to special items that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations. PPL management is not able to forecast whether any of these factors will occur or whether any amounts will be reported for future periods. Therefore, PPL is not able to provide an equivalent GAAP measure for earnings guidance.

Management utilizes "Earnings from Ongoing Operations" as a non-GAAP financial measure that should not be considered as an alternative to reported earnings, or net income, an indicator of operating performance determined in accordance with GAAP. PPL believes that Earnings from Ongoing Operations

is useful and meaningful to investors because it provides management's view of PPL's earnings performance as another criterion in making investment decisions. In addition, PPL's management uses Earnings from Ongoing Operations in measuring achievement of certain corporate performance goals, including targets for certain executive incentive compensation. Other companies may use different measures to present financial performance.

Earnings from Ongoing Operations is adjusted for the impact of special items. Special items are presented in the financial tables on an after-tax basis with the related income taxes on special items separately disclosed. Income taxes on special items, when applicable, are calculated based on the statutory tax rate of the entity where the activity is recorded. Special items may include items such as:

- Unrealized gains or losses on foreign currency economic hedges (as discussed below).*
- Gains and losses on sales of assets not in the ordinary course of business.*
- Impairment charges.*
- Significant workforce reduction and other restructuring effects.*
- Acquisition and divestiture-related adjustments.*
- Other charges or credits that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations.*

Unrealized gains or losses on foreign currency economic hedges include the changes in fair value of foreign currency contracts used to hedge British-pound-sterling-denominated anticipated earnings. The changes in fair value of these contracts are recognized immediately within GAAP earnings. Management believes that excluding these amounts from Earnings from Ongoing Operations until settlement of the contracts provides a better matching of the financial impacts of those contracts with the economic value of PPL's underlying hedged earnings.
